Greatest Common Factor

- We will start with two or more numbers that we want to compare.
- List all the factors of both numbers.
- Find the greatest factor that is common in both numbers.
- Keywords are "none left over", "groups", and "greatest number".

Example:

60: 1, 2, 3, 5, 6, 10, 12, 20, 30, 60
48: 1, 2, 3, 4, 6, 8, 12, 16, 24, 48

Greatest: 12

GCF: 12
